

## Project: Unsupervised Machine Learning

### Participants:

- Spyros Spyridon
- Stavros Doundoulakis

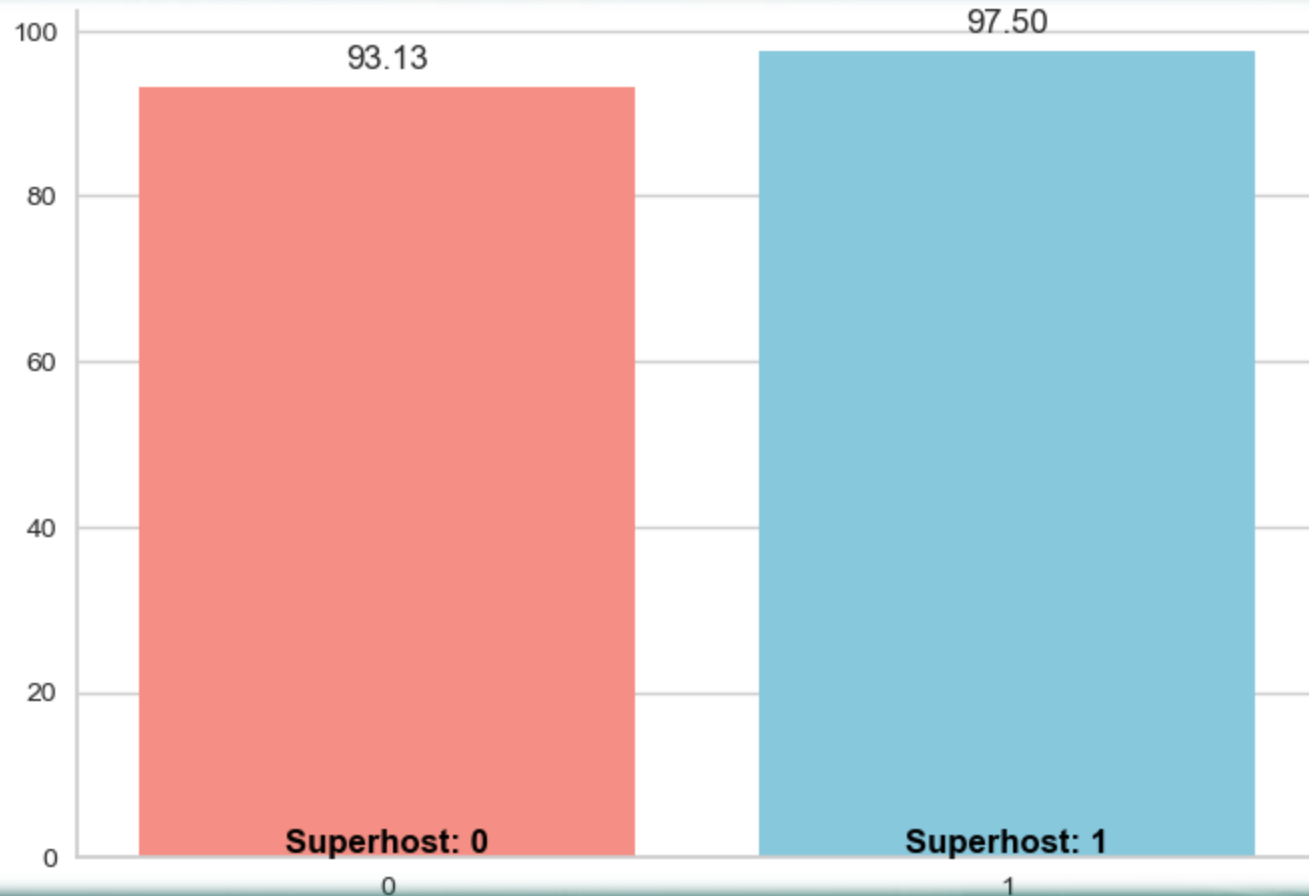

*Using data from our database,  
we trained an algorithm to provide the  
company with useful insights.*

### Superhost:

1. Host at least 10 trips or have 3 reservations that total at least 100 nights.
2. Maintain a 90% response rate or higher.
3. Maintain a 1% cancellation rate (1 cancellation per 100 reservations) or lower.
4. Maintain a 4.8 overall rating.

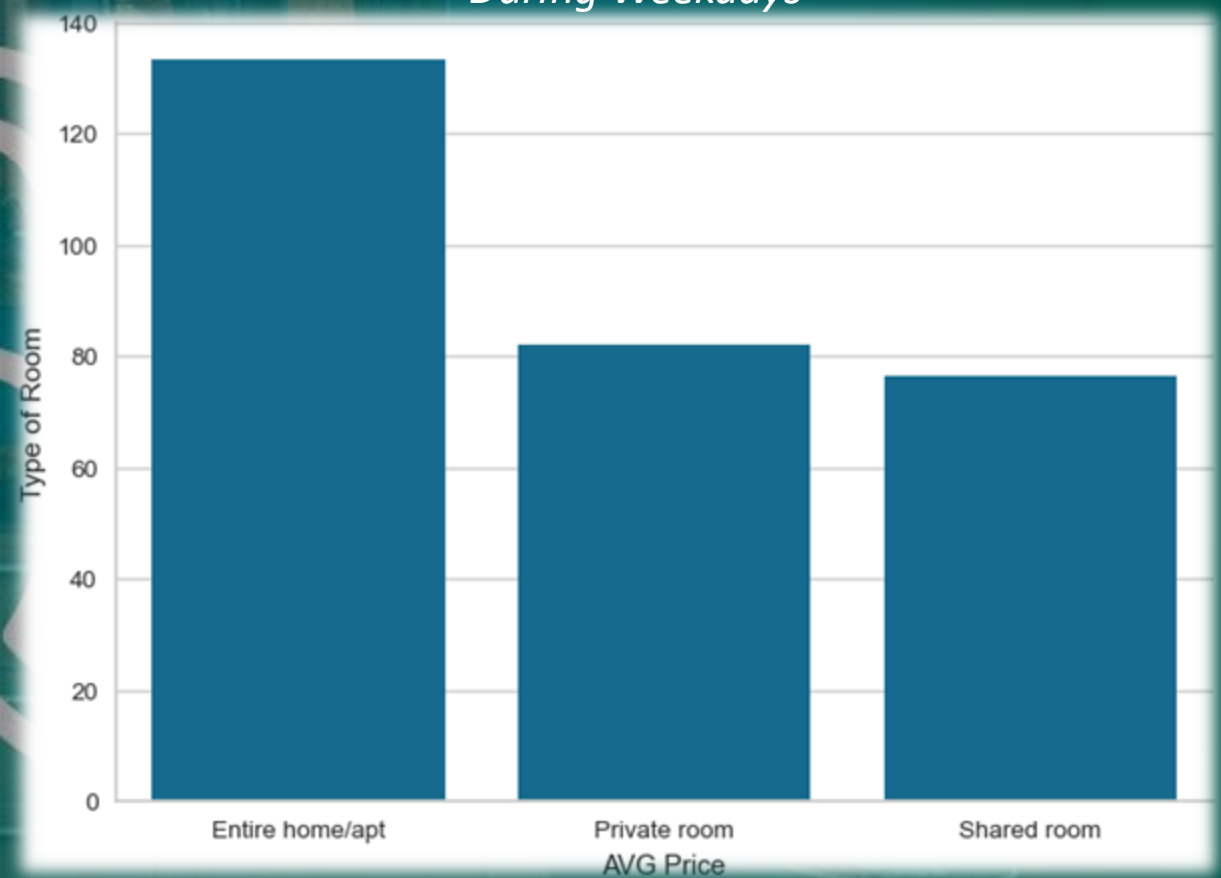

### Mean Guest Satisfaction by Host / Superhost Status

**Average Price for Types of Listings**  
*During Weekends*
